BIOMETRICS

Editor
Peter Armitage

Associate Editors

Murray Aitkin
Richard G. Cornell
Robert N. Curnow
Nicholas E. Day
Klaus Dietz
Joseph L. Fleiss
Klaus Hinkelmann
Joseph Lellouch
Charles A. McGilchrist
Francis H. C. Marriott
Tadakazu Okuno
Donald A. Preece
Ross Prentice
Daniel L. Solomon
William G. Warren

Shorter Communications Editor
John J. Gart

Shorter Communications Associate Editors

Robert M. Elashoff
Vernon T. Farewell
Joseph K. Haseman
Stephen W. Lagakos
Melvin L. Moeschberger
Stuart J. Pocock
K. Subrahmaniam
Robin Thompson

Book Reviews Editor
Richard M. Cormack

Subject Index
Ian Clarke

Editorial Assistants
Catherine W. F. Richenburg
Eileen Rimmer

French Translators
Dr R. Tomassone and members of the French section of the Biometric Society

Editorial Board
H. A. David (Chairman), J. G. Correa da Silva, L. C. A. Corsten, R. N. Curnow, P. Dagnelie, F. A. Graybill, I. Juvancz, D. Rasch, H. Riedwyl, S. R. Searle, M. Tarter, H. Thöni, E. J. Williams

Former Editors
Gertrude M. Cox (1945–55)—*Founding Editor*

John W. Hopkins (1955–7)
Ralph A. Bradley (1957–62)
Franklin A. Graybill (1972–5)
Michael R. Sampford (1962–7)
Herbert A. David (1967–72)
Foster B. Cady (1975–9)

Published quarterly by THE BIOMETRIC SOCIETY

EDITORIAL OFFICE OF *BIOMETRICS:* Correspondence about editorial matters should be sent to the Editor, Professor Peter Armitage, Department of Biomathematics, University of Oxford, Pusey Street, Oxford OX1 2JZ, UNITED KINGDOM.

BUSINESS OFFICE: All correspondence about subscriptions, single copies, changes of address, claims for missing issues, and membership should be sent to the Biometrics Business Office, 806 15th Street NW, Suite 621, Washington, D.C. 20005, U.S.A. Members of the Biometric Society should also advise their respective Regional or National Secretaries (for addresses, see page v) of change of address to insure receipt of notices of meetings, ballots, and all dues notices.

Second-class postage paid at Washington, D.C. and at additional mailing offices. *Biometrics* is published quarterly—in March, June, September and December.

OFFICERS OF THE BIOMETRIC SOCIETY, 1980

GENERAL OFFICERS

President: R. M. Cormack
Vice President: J. A. Nelder
Secretary: L. D. Calvin
Treasurer: J. H. Ellenberg
Business Manager: E. E. Thull
Editor: P. Armitage

COUNCIL

Council Members

1978–1981

P. Bauer, *ROeS*
W. Berchtold, *ROeS*
P. N. Corey, *ENAR*
R. G. Cornell, *ENAR*
R. Elashoff, *WNAR*
T. Postelnicu, *GRo*
D. Rasch, *RGDR*
V. Scheiber, *ROeS*
E. Scott, *WNAR*
G. A. F. Seber, *AR*
A. R. Sen, *ENAR*
M. Shikata, *JR*
J. Stene, *GDe*
J. Svab, *GHu*
A. Taube, *GSd*
G. A. Watterson, *AR*
C. Zippin, *WNAR*

1980–1983

H. Ahrens, *RGDR*
R. Curnow, *BR*
P. Dagnelie, *RBe*
C. Duby, *RF*
G. Enderlein, *RGDR*
Y. Escoufier, *RF*
H. Fink, *DR*
S. M. Free, *ENAR*
G. H. Freeman, *BR*
G. Gérard, *RBe*
B. Greenberg, *ENAR*
J. D. F. Habbema, *ANed*
S. Iyama, *JR*
M. Keuls, *ANed*
B. F. J. Manly, *AR*
E. Marubini, *RItl*
R. Mead, *BR*
J. P. Neves, *RBras*
P. D. Oldham, *BR*
G. Rossi, *RItl*
H. Runfeldt, *DR*
R. Van Strik, *ANed*
R. Vencovsky, *RBras*
T. R. Verdooren, *ANed*
N. Victor, *DR*

REGIONAL OFFICERS

Region	*President*	*Secretary*	*Treasurer*
Australasian	K. P. Haydock	A.J. Swain	D. Ratcliff
Austro-Swiss	P. Bauer	L. Havelec	M. Schneeberger
Belgian	G. Gérard	E. LeBoulenge	E. LeBoulenge

CONTENTS OF VOLUME 36

PART 1 (March 1980)

Selecting crosses using information from a diallel cross ..... R. N. Curnow 1
A note on a model for selection experiments ..... B. F. J. Manly 9
The estimation of intraclass correlation in the analysis of family data ..... A. Donner and J. J. Koval 19
Second-order approximations of ascertainment probabilities
S. E. Hodge, D. A. Greenberg, J. I. Rotter and K. L. Lange 27
Estimation of variance using judgment ordered ranked set samples ..... S. L. Stokes 35
Conditional clustering ..... L. P. Lefkovitch 43
Generalized odds ratios for ordinal data ..... A. Agresti 59
The crossover experiment for clinical trials ..... B. W. Brown, Jr. 69
A treatment allocation procedure for sequential clinical trials ..... C. B. Begg and B. Iglewicz 81
A stochastic model for the occurrence of transient ischemic attacks ..... J. K. Dunn and R. J. Hardy 91
Estimating ventilation/perfusion distribution from inert gas data: a Bayesian approach
D. M. Ryan and A. J. Scott 105
Shorter Communications
Categorical trait sire evaluation by best linear unbiased prediction of future progeny category frequencies ..... R. L. Quaas and L. D. Van Vleck 117
Computing expected mean squares ..... J. H. Goodnight and F. M. Speed 123
Multivariate analysis of variance in a randomized blocks design when covariance matrices are unequal ..... M. S. Garcia Ben and V. J. Yohai 127
Nonlinear regression with autoregressive time series errors ..... C. A. Glasbey 135
An extension of the change-in-ratio method ..... D. L. Otis 141
A note on capture–recapture estimation ..... J. N. Darroch and D. Ratcliff 149
An implementation of the Burnham–Anderson distribution-free method of estimating wildlife densities from line transect data ..... C. E. Gates and P. W. Smith 155
Testing for Hardy–Weinberg equilibrium ..... T. Ledwina and S. Gnot 161
Estimating the error rates of diagnostic tests ..... S. L. Hui and S. D. Walter 167
The Consultant's Forum
A note on the selection of log-linear models ..... M. Aitkin 173
Abstracts 179
Book Reviews 191
News and Announcements 193
Papers to be published in *Biometrics* 194

PART 2 (June 1980)

Summary rates ..... D. H. Freeman, Jr and T. R. Holford 195
Extension of the kappa coefficient ..... H. C. Kraemer 207
An objective method for detecting the shift in basal body temperature in women
J. P. Royston and R. M. Abrams 217
Multivariate bioassay ..... A. Vølund 225
A reparameterization of a genetic selection index to locate its sampling properties
J. F. Hayes and W. G. Hill 237
An epidemic chain model ..... N. Becker 249
An analysis of comparative carcinogenesis experiments based on multiple times to tumor
M. H. Gail, T. J. Santner and C. C. Brown 255
An illness–death model for the study of the carcinogenic process using survival/sacrifice data
R. L. Kodell and C. J. Nelson 267
Shorter Communications
On sampling spatial patterns by distance methods ..... K. Byth and B. D. Ripley 279
Large sample formulae for the expected number of matches in a category matched design
S. D. Walter 285
Bias reduction using Mahalanobis-metric matching ..... D. B. Rubin 293
The analysis of rates and survivorship using log-linear models ..... T. R. Holford 299
Analysis under Cox's failure time model using weighted least squares ..... J. H. Lubin 307
A note on an indirect method for estimating the number of small particles in a blood sample
Ch. E. Minder 313
On modelling microbial infections ..... B. J. T. Morgan and S. A. Watts 317

The Consultant's Forum
Editor's note ... 322
Statistical considerations for a medical data base ... J. M. Dambrosia and J. H. Ellenberg 323
On the complexity of investigating chronic illness
C. F. Starmer, K. L. Lee, F. E. Harrell and R. A. Rosati 333
Why data bases should not replace randomized clinical trials ... D. P. Byar 337
A simple approximation for calculating sample sizes for comparing independent proportions
J. L. Fleiss, A. Tytun and H. K. Ury 343
On approximate sample sizes for comparing two independent proportions with the use of Yates' correction ... H. K. Ury and J. L. Fleiss 347
Correspondence ... 353
Obituary: Jerome Cornfield ... 357
Book Reviews ... 359
Abstracts ... 363
The Biometric Society ... 373
News and Announcements ... 375
Papers to be published in *Biometrics* ... 379

PART 3 (September 1980)

Assessing laboratory evidence for neoplastic activity ... N. Mantel 381
Mark–recapture estimation of salmon smolt runs ... P. D. M. Macdonald and H. D. Smith 401
A modified analysis of the Jolly–Seber capture–recapture model ... S. T. Buckland 419
Estimating the population sizes of different types of organisms in a plankton sample ... R. C. Dahiya 437
Diseases having two classes of severity: Estimation of the proportions of each manifestation by maximum likelihood ... C. Bonaïti and F. Demenais 447
Probability of extinction in a finite population with truncation selection ... G. L. Ghai 461
Contact networks and the study of contagion ... P. M. Hartigan 473
Incomplete block designs for parallel-line assays ... K. Win and A. Dey 487
Mixtures of continuous and categorical variables in discriminant analysis ... W. J. Krzanowski 493
On the relationship between the F test and the overall error rate for variable selection in two-group discriminant analysis ... G. J. McLachlan 501
Shorter Communications
A stepwise variable selection procedure for nonlinear regression models
P. N. Peduzzi, R. J. Hardy and T. R. Holford 511
Two-stage test of independence using Kendall's statistic ... J. D. Spurrier and J. E. Hewett 517
Two parameterization of predictive value for multisite screening
R. McHugh, T. Church, J. Mandel and C. White 523
Mean and variance of partially-truncated distributions ... L. Lee and R. G. Krutchkoff 531
The Consultant's Forum
Survival analysis of drug combinations using a hazards model with time-dependent covariates
D. M. Stablein, W. H. Carter, Jr and G. L. Wampler 537
Query: The geometric mean functional relationship
Response ... P. Sprent and G. R. Dolby 547
Correspondence ... 551
Obituaries: G. Lefort and J. G. Skellan ... 557
Book Reviews ... 561
The Biometric Society ... 565
News and Announcements ... 567
Papers to be published in *Biometrics* ... 569

PART 4 (December 1980)

William Gemmell Cochran—A Personal Tribute ... R. L. Anderson 574
Optimum age-specific harvesting in a nonlinear population model ... W. J. Reed 579
Best linear unbiased estimators for stereology ... L.-M. Cruz-Orive 595
Modified Kolmogorov–Smirnov test procedures with application to arbitrarily right-censored data
T. R. Fleming, J. R. O'Fallon, P. C. O'Brien and D. P. Harrington 607
A comparison of tests for Hardy–Weinberg equilibrium ... T. H. Emigh 627
The probability of losing an allele when diploid genotypes are sampled ... H.-R. Gregorius 643
Shorter Communications
Bootstrapping a basic inequality in the analysis of joint action of two drugs
J. Wahrendorf and C. C. Brown 653
Multiple probit analysis with a nonzero background ... V. Hasselblad, A. G. Stead and J. P. Creason 659
A modified Cochran–Friedman test with missing observations and ordered categorical data ... J. Klotz 665
Comparison of two populations with multivariate data ... J. E. Hewett and Z. Lababidi 671

The Consultant's Forum
Training of statisticians for clinical trials: Introduction ..... P. Feigl 677
The training of clinical trials statisticians: a clinician's view ..... D. Hammond 679
Teaching the principles of clinical trials design and management... A. V. Peterson, Jr and L. D. Fisher 687
The training of statisticians for cooperative clinical trials: a working statistician's viewpoint
E. A. Gehan 699
Estimation of the mean for lognormal data containing zeroes and left-censored values, with applications to the measurement of worker exposure to air contaminants
W. J. Owen and T. A. DeRouen 707
A new approach to the analysis of clinical drug trials with withdrawals ..... A. L. Gould 721
Reader Reaction: Comparative calibration and congeneric measurements ..... A. A. M. Jansen 729

Response rate, natural 659*
  variability 668
Response-surface analysis 537*
Retinoblastoma 447
Return 581
Robbins's estimator 149
Rounded data 554

Sacrifice 267* Salmon smolts 401*
Sacrifice 267*
Salmon smolts 401*
Sample size 343*
  unequal 344, 347
Sampling, allelic 643*
  area-weighted 595*
  double 517
  for spatial specimens 595*
  gametes 643
  isotropic uniform random 595*
  matched 293*
  semisystematic 279*
  sub- 437*, 595*
  systematic 595*
  two-stage 595
Scaling, iterative 495
Scheffé-type test 127*
Screening test 167
  multiphasic 523*
  multisite 523*
Sections 595*
Segregation analysis 454
Selection, natural and artificial 461
  limits to 461*
  indices 1*
  single 28
Selection experiments 9*
Selection of patients 328
Selective predation 9*
Sensitivity 167*, 523*
Shelf life 551
Sibship 20, 29, 447
Simulation 9*
Sign test 63
Significance tests 627
  discrete 381*
  multiple 381*
Similarity hypothesis 225*
Single-census analysis 403
Simultaneous testing 173*
  procedure 501
Sire evaluation 117*
Skellam, John Gordon 558
Smoothing 105*
Snedecor distribution 131
Spacings 255*
Spanning tree 47
Spearman–Brown formula 207*
Spatial randomness 279*
Specificity 167*, 523*
Standardization, direct and indirect 195*
Stochastic process 91*
Stratification 81*
  in tiers 386
Strauss process 282
Structural relationship 547*
Survival 267*
  analysis 299*, 307*, 537*
  curve 355

$T(\frac{1}{2})$ rule 383
Teaching 687*
Tests of hypotheses 627*
Ties 665*
Time-to-response analysis 381*
Time to tumour 255, 267*
Time-dependence 317*
Time test 170
Training of statisticians 677, 679, 687, 699*
Traits 24, 237
  categorical 117*
  monogenic 27*
  polygenic 27*
Treatment allocation 81*
  of choice 323*
  optimum combination 542
Triangular distribution 158
Trinomial distribution 142
Truncation selection 461
Tumorigenesis 381*
  experiments 255*
Two populations, comparison 671
Two-sample test 607*
Two-stage sampling 595
Two-stage test 517
2×2 tables 59, 343, 347*

Unbalanced models 123
Uncontrolled data 331
Unobserved outcomes, probability of 149*

Variable expressivity 447*
  selection 501*, 511, 554
Variance estimator 35*
Vital rates 299*

Wald statistic 511*
Weibull distribution 268, 617
  model 309
  –Markov model 261
Wildlife estimation 155*
Wishart distribution 128
Withdrawals from clinical trials 721*
Worker exposure 707*

Yates' correction 347*

Zeroes 707*

INDEX OF BOOKS REVIEWED

ANDERSEN, E. B. **Discrete Statistical Models with Social Science Applications.** (H. Goldstein) 741

BRUNI, C. *et al.* (eds). **Systems Theory in Immunology, No. 32, Lecture Notes in Biomathematics.** (J. P. Hinde) 740

CANTILLON, P. and DAGNELIE, P. (eds). **Statistique et Informatique en Agronomie/Statistics and Computer Science in Agriculture.** (G. H. Freeman) 564

CLARK, I. **Practical Geostatistics.** (R. Sibson) 743

EWENS, W. J. **Mathematical Population Genetics. (Biomathematics, Vol. 9.)** (B. S. Weir) 739

GILL, J. L. **Design and Analysis of Experiments in the Animal and Medical Sciences.** (H. D. Patterson) 741

GOKHALE, D. V. and KULLBACK, S. **Information Theory and Contingency Tables.** (J. N. Darroch) 360

GRASSLE, J. F., PATIL, G. P., SMITH, W. and TAILLIE, C. (eds). **Ecological Diversity in Theory and Practice. Vol. 6 in the series Statistical Ecology.** (E. C. Pielou) 742

HOME OFFICE. **Report on the LD50 Test.** (D. J. Finney) 361

JAMBU, M. **Classification Automatique pour l'Analyse des Données. 1. Méthodes et Algorithmes.** (P. Dagnelie) 359

JAMBU, M. et LEBEAUX, M. O. **Classification Automatique pour l'Analyse des Données. 2. Logiciels.** (P. Dagnelie) 359

JEFFERS, J. N. R. **An Introduction to Systems Analysis: with Ecological Applications.** (R. K. Steinhorst) 191

JENKINS, G. M. **Practical Experiences with Modelling and Forecasting Time Series.** (R. W. Poole) 359

KELLY, F. P. **Reversibility and Stochastic Networks.** (P. A. P. Moran) 739

KENNEDY, W. J., Jr and GENTLE, J. E. **Statistical Computing.** (J. A. Nelder) 743

KRAFFT, O. **Lineare Statistische Modelle und Optimale Versuchsplane.** (P. Bauer) 562

LINDER, A. and BERCHTOLD, W. **Elementare Statistische Methoden.** (H. H. Bock) 563

MILLER, M. C., III (ed.). **Mainland's Notes on Biometry in Medical Research.** (G. Berry) 562

MILLER, M. C., III (ed.). **Mainland's Notes from a Laboratory of Medical Statistics.** (M. V. Shotter) 563

OTIS, D. L., BURNHAM, K. P., WHITE, G. C. and ANDERSON, D. R. **Statistical Inference from Capture Data on Closed Animal Populations.** (D. G. Chapman) 362

ROSEN, R. and SMALL, F. M. **Progress in Theoretical Biology, Vol. 2.** (R. N. Curnow) 191

SINGER, B. **Distribution-Free Methods for Non-Parametric Methods: a Classified and Selected Bibliography.** (R. M. Cormack) 564

STEINBERG, J. (ed.). **Synthetic Estimates for Small Areas: Statistical Workshop Papers and Discussion.** (J. A. Rowntree) 739

SYSKI, R. **Information Processes: A First Look.** (D. Cooke) 360

THOMPSON, J. N., Jr and THODAY, J. M. (eds). **Quantitive Genetic Variation.** (B. S. Weir) 561

WU, J. S. **Statistical Genetics (Breeding for Milk, Meat, Eggs and Wool).** (A. Robertson) 562
